The Next Generation

The Peugeot E7™ has truly revolutionised the UK's hackney taxi market since its launch, allowing you to carry up to seven passengers in comfort and style. Tailor-made for the professional driver, E7™ combines a class leading engine with unrivalled levels of comfort, accessibility and space making it the perfect cab for the job you do.

For more information or to arrange your free, no-obligation test drive freephone **0800 587 9630**, email **info@cabdirect.com** or visit **www.cabdirect.com**. We look forward to meeting you.

Designed and manufactured jointly by Peugeot and Cab Direct, reliability and performance are hallmarks of the E7's success in the hard-working UK hackney taxi fleet. The secret of that success lies in a vehicle that is genuinely purpose-built, combining a class-leading engine, drive train and vehicle body, all designed to work in perfect harmony.

Purpose-built Taxi

Think Smart, Think 

Six-seat passenger compartment

Protective bumpers with integral fog lamps

Original EasyGlide™ pull-out ramp

Development

A £473 million development programme has created the ideal combination of engine, clutch and gearbox, designed and tested in tandem with the E7's high-strength monocoque vehicle body. Modern design excellence is carried through to the superb driving position, high impact partition screen and comfortable rear passenger compartment to complete the ideal hackney taxi.

Side rubbing strips and large, multi-section bumpers provide vital protection against minor bumps and scrapes. And unlike many other taxis, the E7™ comes to you with the reassurance of the highest possible standard of safety testing – European Whole Vehicle Type Approval (Type Approval number e11*2001/116*0315).

Drive in Style

Dash-mounted intercom

FareAssist™ quick release door system

Overhead storage compartments

When your vehicle is your workplace, comfort and convenience are certain to be high on your list of requirements. Which is exactly why E7™ offers a new dimension in driver benefits.

Comfort Cab

Inspired vehicle design has created even greater driver comfort. The carefully sculpted driver's seat comes with active, pump-action height and tilt adjustment which, combined with steering column adjustment, allow you to create your optimum driving position. E7's top-specification driver's seat even provides additional lumbar support – perfect for anyone who spends long hours behind the wheel. In addition the low, one-step well is also ideal for anyone who gets in and out of the cab several times a day.

Electric one-touch windows, multi-function heater and air conditioning – all as standard features – mean you’re sure to find the right working temperature, whatever the weather. The in-built CD/radio comes with remote controls, handily located on the steering column. You can even choose to play front and rear speakers or switch to front only, so you can enjoy your favourite music while your passengers chat amongst themselves. Plus, for even greater convenience, the E7™ taxi now also features our unique new FareAssist™ quick release door system. This means you can unlatch your passenger doors at the touch of a button.

Storage Space

You’ll also find numerous storage areas for the daily essentials of the working taxi driver. In addition to overhead lockers, door cubbies and under-seat pockets the centre console storage bin is sure to come in handy, as will the dashboard mounted retractable cup holders.

Six-speed Peugeot auto gearbox

Speed-sensitive power steering

Now Available in Auto or Manual

Quite simply E7™ drives like a dream. Numerous independent road tests have highlighted the vehicle's superb all-round vision, manoeuvrability and handling.

The raised driver position plus large area windscreen and side windows create exceptional visibility, especially useful in busy traffic. Similarly the large area tailgate window provides enhanced rear visibility which, together with superb full-size wide angle door mirrors, will make your life as easy as possible. Add to this Peugeot's latest electro hydraulic speed-sensitive power steering, and the legendary responsiveness of the HDi engine and you have a nimble and manoeuvrable cab that's ideal for the busiest traffic conditions.

Now, for the first time, you also have the choice of Peugeot's easy action six-speed gearbox or the all-new, fully automatic option - so smooth you'll scarcely know you've changed gear.

Passenger Comfort

E7's spacious passenger compartment promises your customers a relaxing journey, every fare.

Excellent road-holding and modern suspension guarantee passengers a flat and comfortable ride. Inside, comfortable facing seating accommodates six passengers in the rear compartment. Plus, with the addition of our new soft-sit rear tip-up seats, your customers will now enjoy even greater comfort levels. Finished to the highest quality using proven, hard-wearing material, the passenger area also benefits from separately controlled heating. Similarly the dash-mounted EasyTalk™ two-way intercom – uniquely designed for the E7™ with variable audio control – makes communication easy. Business passengers can even plug in their laptop as they enjoy the journey.

Bags of Space

Whether it's hotels, train stations or airport runs, today's passengers often come with plenty of luggage. Which is why E7™ brings you an amazing 70% more luggage space. Even better, the celebrated EasySlide™ rear seat enables you to create even more room for loading cases out of harm's way. For added storage choose an additional luggage pen up front beside the driver. You also have the option of the E7™ Plus, with even greater luggage room – ideal for regular airport fares.

Safety Zone

Sadly, protection from violence against taxi drivers is becoming ever more important. The steel reinforced partition features a high-impact protection screen tested to European standards. The driver can also choose added security by locking both front doors while the rear doors remain open for passengers.

Peugeot HDi

42.8

AUTO

Diesel Technology

Pioneers in diesel engines since 1928, Peugeot continues to lead the world in diesel technology.

Powered by the latest generation of diesel engines, the *E7™* power plant is more economical than ever before. Offering a class leading blend of performance and economy, *E7™* returns an impressive 42.8mpg (auto – 37.1mpg) on the combined cycle, making it one of the most cost effective hackneys on the market today.

Pulling Power

Power is one thing, smooth performance another. The *E7's* 2.0 litre HDi engine manages to deliver both at once, for maximum driveability and responsiveness. In fact, hand in hand with improved fuel efficiency, *E7's* latest engine returns an increased 130 brake horsepower (auto – 163

brake horsepower). Touch the accelerator and the HDi engine responds instantly and eagerly. Take your foot off the pedal and *E7™* decelerates with perfect poise. All round-smoothness that's a joy for both driver and passengers.

Money Saver

When times are tough, it's more important than ever to get the best value out of your cab. It's your livelihood after all. With Peugeot's latest diesel engine under the bonnet you can be sure to do just that. With HDi you can work longer – and earn more – on one tank of fuel than you can with other purpose built taxis.

Now that really matters.

*Official VCA fuel consumption figures, combined cycle.

E7's Peugeot HDi engine is quite simply one of the most fuel efficient and environmentally friendly power-plants on the market.

Economy

Because Peugeot's direct injection system delivers fuel with incredible precision, HDi engines carefully regulate use of fuel, cutting the overall amount you need and making them more economical than other diesel engines. On top of this E7's modern aerodynamic shape, including the stylish low-profile taxi sign and rear spoiler, also improves fuel consumption through reduced wind resistance.

Environment

E7's HDi engine comfortably exceeds the Euro 5 emissions standard, which means it substantially reduces harmful exhaust fumes that can pollute towns and cities. CO² emissions - the 'greenhouse gas' that causes global warming - are also significantly lower than other hackney taxis. The HDi engine can even operate on up to 30% bio diesel.

"The E7's fuel efficiency is a big plus for me."

Tommy Larravide, Peugeot E7™ owner.

E7's market-leading HDi engine is complemented by its modern vehicle body and platform.

Smooth Roller

Driving thousands of miles every year is guaranteed to make you and your back sensitive to every bump of the road. The ultra-modern vehicle platform means that E7™ promises an even more comfortable journey for both you and your passengers.

All-round independent suspension ensures excellent road holding and minimal roll. This is complemented by the strong body shell, boasting the best torsional stiffness in its class. Superior build quality – including improved under body sound insulation – also means that the E7™ offers a smoother, quieter ride with reduced vibration and road noise.

Even Smoother, Even Safer

Think Smart, Think 

Stop Fast

All-round disc brakes, aided by advanced four-channel ABS braking plus Emergency Brake Assist, ensure impressive stopping ability, helping keep you on the right track when lesser vehicles would be skidding out of control.

Safety Shell

Safety for you and your passengers is paramount. E7's monocoque vehicle body provides a supremely strong shell to manage everyday driving stresses as effectively as it copes with the drama of an accident. In-built crumple zones are designed to absorb energy in the event of impact, making it safer for both driver and passengers and for other road users than a traditional, chassis-built vehicle. Add pre-tensioning 3-point

seat belts and front and rear head restraints, along with front and side airbags for the driver, and it's easy to see why E7™ is a leader in the field of safety.

Autolock™ indicators also enable you to prevent your passengers exiting into traffic from the wrong side of the vehicle.

Access for All

Taxis provide a vital component of the UK's public transport network. Disabled people in particular often depend on taxis to get about, which is why E7™ raises standards in accessibility for disabled passengers. Options include induction loops for the hard of hearing, while all E7's are fully wheelchair accessible.

Easy Does It

Manual or cab-operated electric side-steps, together with high-visibility grab handles and floor edging assist passenger entry and exit, while both rear and tip-up seats are ergonomically designed for ease of use. E7's wide doorway is a bonus for wheelchair users in particular. You also have a choice of wheelchair ramps, depending on the model, including the revolutionary EasyGlide™ pull-out ramp – even lighter, even quicker and even easier to use.

Wheelchair Security

Once inside the vehicle, the larger flat-floor area and improved headroom make manoeuvring the wheelchair into the correct travelling position so much easier than in other hackney cabs. Quick-attach restraints make securing the wheelchair as easy as possible and the wheelchair passenger is also secured by a full lap-and-diagonal seat belt. Both wheelchair and occupant restraints have been tested to the highest standards ever achieved in a UK taxi.

At Cab Direct we believe in choice – and that taxi owners and drivers are best placed to decide on the ideal vehicle for the job you do. That’s why we’ve created three fantastic models for you to choose from.

Additional Features by Model

Why Cab Direct?

There are many good reasons why more people choose Cab Direct – and choose the E7™ - than any other modern taxi manufacturer in the UK.

- Engineering excellence through a unique joint-manufacturing partnership with Peugeot
- Solid company background, trading successfully in the taxi market for 20 years
- Safety-assured with European Whole Vehicle Type Approval
- Free, no-obligation demonstrations throughout the UK
- Free delivery anywhere in the UK
- Peace of mind with free five year, unlimited mileage engine and gearbox warranty
- Service and support from more than 300 local service partners
- Free technical helpline, open seven days a week

Many companies have tried to copy our vehicles but none match the overall quality of product, backup service and value for money represented by the record-breaking E7™.

Peace of Mind

When your vehicle is your livelihood, you'll want to know your cab is reliable and you'll want to be sure you're covered should anything major go wrong.

Your Reassurance

Modern build quality combined with the legendary Peugeot HDi engine have given the E7™ an enviable reputation for reliability. That's why so much of our business comes from E7™ drivers who recommend the vehicle to other drivers.

Service and Support

Efficient service and support is vital for everyone in the hard-working taxi industry. First and foremost you'll have access to more than 300 local service partners throughout the UK. There's also the added benefit of our huge stock of E7™ parts which can be delivered overnight to you or your garage service provider. We even provide a free technical helpline, open seven days a week, to help you resolve any queries and issues that may arise. You'll also have the benefit of free Peugeot Assistance breakdown cover for the first year (three years on E7 XS).

"I strongly recommend the E7 and Cab Direct to anyone looking for a quality vehicle and first rate service."

Blyth Garvie, Peugeot E7 owner.
