# Economy & Versatility

## Economy

As the newest addition to our wheelchair accessible taxi range, the Ford Journey™ combines ultra-modern comfort and good looks with the latest in fuel efficient, environmentally friendly performance. Based on the acclaimed Tourneo Connect, Journey™ delivers all the style and substance you'd expect from a premium vehicle without breaking the bank. Superb reliability and 58.9mpg\* in and around town are your guarantee of low running costs too.

\*Combined cycle (manual).

## Versatility

Journey™ combines Ford's bold, contemporary styling with quick and easy wheelchair access to provide the ideal taxi for the modern day driver. With its unique FlatFold™ ramp, Journey™ has been designed to offer an efficient five seat car one minute and a fully wheelchair accessible taxi the next. For the first time ever, you can now add tip and turn seats in the rear giving you the versatility to cater to larger groups when the wheelchair space is not in use.

# Comfort & Drive

**Manual or  
auto**

## Comfort

With premium finishes, high quality materials and a host of useful technologies on board, *Journey™* provides a spacious and practical environment that you and your passengers will enjoy. When things get cold, heated mirrors and a 'Quickclear' front windscreen get you going faster. Additional standard features such as Ford SYNC audio with Bluetooth® and voice activation, air conditioning and electric windows throughout also combine to make your life easier. There's a cup holder and plenty of handy storage compartments too.

## Drive

Economical, powerful and fun to drive, *Journey™* has it all. Featuring Ford's new Duratorq TDCi diesel engine under the bonnet, *Journey™* offers maximum control and driving comfort as well as exceptional fuel-efficiency. The uprated suspension system and anti-roll bar deliver excellent ride, handling and stability. The large windscreen and door mirrors offer superb all-round visibility and the steering wheel is adjustable so you can find your ideal driving position. Add the compact, perfectly positioned gearshift and you're all set for those long hours behind the wheel.

# Access & Model Choice

**New generation  
FlatFold™ ramp**

**Now available  
with 7 seats**

## Wheelchair Access

Our latest generation FlatFold™ ramp integrates with the vehicle floor when not in use to give you a huge, unobstructed boot area. Then, when needed, it simply pulls out from the rear floor of the vehicle to provide an ultra-strong wheelchair access point, with an impressively low gradient. Once inside, the wheelchair is secured with easy to use, high quality wheelchair restraints while a lap and diagonal seat belt ensures optimum security for the wheelchair user.

## Model Choice

Available in manual or auto transmission and with a choice of trim level, there's a *Journey™* for everyone. You can also choose between short or long wheelbase so you have a car that best suits the job you do. The standard *Journey™* accommodates driver, wheelchair passenger and up to two seated passengers whilst the longer *Plus* model offers wheelchair access without the need to fold down the rear seats. It can also accommodate one or two tip and turn seats in the rear for increased passenger carrying capacity.

# Technical Specification & Colour Choice

*Journey™* is available with manual or auto transmission and in standard or long wheelbase, *Plus*, model.
