Maximise Your Earnings

**44.8
MPG***

Versatility

In the UK's hard-working taxi industry you need a vehicle that fits your needs, whatever the nature of your business. For many, that means maximising passenger capacity while also being able to provide wheelchair access when needed. That's where all-new *MaxiCab™* comes in. Tailor-made for the taxi trade, it offers a nine seat MPV with bags of luggage space one minute and then full wheelchair access the next.

Economy

As a cabbie, maximising your earning potential is top priority. With Ford's efficient diesel technology at work under the bonnet, *MaxiCab™* promises superb handling and great economy. Returning up to 44.8 miles per gallon on the combined cycle, with Ford's latest 2.0 litre diesel engine, you'll be better off at the end of your shift. Start/stop technology, an EcoMode information system and service intervals of 18,000 miles also combine to ensure you're getting the most from your workhorse.

A Great Place to Be

Comfort

Comfort levels in *MaxiCab™* are second to none. Excellent visibility is achieved thanks to the raised driving position and wide angle door mirrors. While a heated driver's seat with 10-way adjustment, armrest and lumbar support will help you find your ideal driving position. All controls are located within easy reach and there are plenty of storage options too. Add an impressive list of standard equipment, including front and rear air conditioning and voice activated connectivity and *MaxiCab™* is a comfortable place to be.

Drive

MaxiCab™ combines the performance and reliability for which Ford and Cab Direct are renowned. A full line up of passive and active safety features such as Hill Start Assist and Side Wind Stabilisation make use of the latest technology to protect everyone on board. Cruise control, parking sensors, automatic headlights, rain sensing wipers and a quickclear heated windscreen also help to provide an enhanced driving experience. You can choose between manual or automatic transmission too.

Cater for Every Fare

Space

If you're looking for maximum people carrying capacity without breaking the bank, *MaxiCab™* offers the perfect solution. This spacious MPV allows you to carry up to eight seated passengers. You can choose between the original Ford seats or our specially developed conference style layout. Where it really excels though is with the sheer volume of luggage space available - there's a whopping 1,447 litres, allowing you to cater for all eventualities.

Access

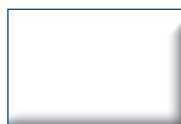

If it's an affordable, accessible multi-seat people carrier you need, *MaxiCab™* ticks all the boxes. If you do regular wheelchair work, opt for our our new BiFold™ access ramp which is stored in an upright position, flush against the rear quarter panel in the boot so as not to infringe on the luggage space available. Then, when you need it, simply release the latch holding it in place and it will swing round into position, ready to be deployed.
